

The World's Seafood Expert

By Thai Union Group

The One Journey Of TU

The journey of Thai Union Group is an exploration seeking seafood of the finest quality for the entire world.

All in One

The business of Thai Union starts from the sea, the source of our raw materials, and continues through global standard production processes, packaging and world-wide distribution. Each one of these steps is undertaken with meticulous attention to detail.

Company Profile

Thai Union Group PCL. is a global seafood leader with international consumer-favorite brands such as Chicken of the Sea, John West, Petit Navire, Parmentier, Mareblu, King Oscar, and Rügen Fisch and Thai-leading brands SEAELECT, Fisho and Bellotta. We have brought nutritious, tasty and innovative products to tables around the world for generations.

Thai Union's vision is to be the world's most trusted seafood leader. In 2016, we launched our sustainability strategy, SeaChange®, to deliver real and lasting changes in the way we operate and in the wider Thai and global fishing industries.

We firmly commit to responsible and ethical business practices globally, including within our supply chains. Thai Union is a proud member of the United Nations Global Compact, a founding member of the International Seafood Sustainability Foundation, and has been recognized by the Dow Jones Sustainability Index for three consecutive years.

We challenge ourselves to think boldly and take calculated risks to unlock revolutionary changes in the way seafood is procured, produced, packaged and consumed. Thai Union launched the Global Innovation Incubator (Gii) in 2015 – a world-class R&D facility, and the first of its kind in Thailand. The Gii deploys unconventional investigation of seafood to enhance product quality, nutrition and satisfaction, and to create shared value for our investors while carving a path toward seafood sustainability. Combining the forces of internationally acclaimed academic and in-house researchers, the Gii puts Thai Union ahead of the curve and will modernize the greater seafood industry.

One Quality, The Best Quality

“The Best” is the only quality label of all Thai Union’s products.

A high-angle photograph of a dessert spread on a white marble surface. In the top right, a stack of chocolate brownies is topped with yellow and dark crumbs. Below them, a metal pie dish contains several golden-brown, flaky turnovers. To the left of the pie, two small white ceramic jugs are visible. In the center, two glasses of ice cream are topped with various toppings, including green crumbles and yellow cubes. To the right of the glasses, a white bowl contains a scoop of ice cream, strawberries, and blackberries. In the foreground, a white plate holds three small white ramekins containing different types of toppings: yellow cubes, dark brown crumbs, and a mixture of yellow and dark crumbs. A small white spoon rests on the plate next to the ramekins. Two glasses of amber-colored liquid are also visible on the left side of the plate.

ONE GOAL, ONE LEADER

As we aim to be number one, we never cease developing by means of global production standards.

Food Safety and Quality Standards

The Company will be manufacturer of quality processed seafood for export with focus on producing products that are safe, hygienic, with up to standard quality, met with customer acceptance and satisfaction up to having continuous improvement.

Top quality products are always our first priority, which our domestic and international customers can be assured of. Our products are of international standards and quality, are traceable, and are responsive to the needs of our customers globally.

All TU products pass our rigorous quality inspection system in every stage of production; biological, chemical and physical. TU's own inspection laboratory is certified with ISO/IEC 17025 by the Bureau of Laboratory Quality Standards, Department of Medical Sciences, Ministry of Public Health. The lab was also awarded the best 2010 agricultural product inspection laboratory from the National Bureau of Agricultural Commodity and Food Standards (ACFS), Ministry of Agricultural and Cooperatives.

With our continuous determination and attention on sanitation/ hygiene and food safety, we have been certified with various quality accreditations from both national and international organizations. The noteworthy include ISO 9001:2008 for quality management system; ISO 14001 for environmental management system; Best Aquaculture Practices – certification standard for shrimp production throughout the value chain processes; HACCP, GMP, BRC, IFS, Kosher, HALAL, etc. These notations affirm the company's concise and rigorous quality control and inspection system as we endeavor only the best quality food for our customers.
